Role

The host company is looking for a Front-End Developer to collaborate on client focused projects. You will gain valuable commercial experience working on website and design based development for our clients in a variety of sectors. You will be working with a Scrum team providing innovative solutions to problems.

Tasks

- Software design, coding and testing features and system components, using agreed standards and tools
- Work with product owners, testers, analysts and architects within an Agile team to deliver application features end-to-end
- Identify and resolve issues with applications, following agreed procedures
- Uses pre-processing languages like LESS and jade to rapidly iterate designs.
- Works with developers to establish the user interface.

Personal Skills

Essential:

- Degree in Computer Sciences and Maths related
- Has a strong background in HTML, CSS and JavaScript.
- Knowledge of Java and/or .NET platform
- A self-motivated mind-set with a desire to solve problems
- Willingness and confidence to speak directly with clients
- Team-player
- Is comfortable working in a rapid iteration development cycle.
- Can rapidly prototype ideas and concepts.

Desirable:

- Interests in other fields, whether it's web design, blogging, VR or travel.
- Awareness of how your ideas and work affects the wider project, both good and bad.
- Good understanding of key UI and UX concepts, web usability standards and cross-browser development

The Host Company
