

360 Treasury Systems AG (360T), based in Frankfurt/Germany, is one of the leading global providers of web-based trading technology for OTC financial instruments, particularly currency exchange, short term money market loan/deposits and interest rate derivatives. Based on its proprietary core technology, 360T's trading platform is currently the largest independent multi-bank portal, offering a deep liquidity of more than 200 global market makers used by over 1.500+ client organizations worldwide. The company offers also a professional white label trading technology for electronic trading services to a closed group of users on a proprietary branded platform.

360T has globally a strong market position with subsidiaries in New York, Singapore, Dubai and Mumbai and presences in 75 countries worldwide.

## **Intern Java Developer (m/f)**

### ***Your Responsibilities:***

- Your tasks will be to design, implement and support our systems. We are using a wide variety of standard technologies, for example MOM, Applets/Servlets, Database (Oracle) and Swing
- We will give you the opportunity to get to know different technologies and take on a responsibility for challenging tasks
- We are willing to define your tasks and responsibilities in line with your University requirements

### ***Your Profile:***

- Ideally you are studying at University or University of Applied Science with focus on IT
- You have first or advanced experience in programming with Java and its libraries (Swing, JDBC, applet, JFC)
- You have basic knowledge of:
  - XML, XSL, XSLT, Database systems (including Oracle and/or MySQL)
  - One or more scripting languages (Python, Groovy, Ruby)
  - Code generation technologies, Object-relational-mapping technologies
- You are able to work analytically and systematically with a quick-wittedness
- You are willing to work self-dependent
- Furthermore you are self-confident and work with great commitment
- A high level of spoken and written English is required

### ***360T Intern Program***

- The duration of the internship will be individually discussed with the applicant (at least one semester)
- For Bachelor Students we could offer a combination of the required praxis-project in line with the University requirements including the Bachelor Thesis. For Master Students we also offer the praxis-project followed by the Master Thesis in line with the University requirements
- After the internship (Bachelor or Master) it is possible to change into a working student relationship. In case of corresponding qualification a transfer to a permanent employment with an attractive remuneration is also possible

We offer an outstanding opportunity for a highly motivated individual to participate in the growth of a successful technology company in the financial sector. The position is based in Frankfurt/Main and is vacant immediately. If your background and qualifications meet these specifications, please forward your application including your salary expectation, earliest starting date via eMail to:
