360 Treasury Systems AG (360T), based in Frankfurt/Germany, is one of the leading global providers of web-based trading technology for OTC financial instruments, particularly currency exchange, short term money market loan/deposits and interest rate derivatives. Based on its proprietary core technology, 360T's trading platform is currently the largest independent multi-bank portal, offering a deep liquidity of more than 200 global market makers used by over 1500+ client organizations worldwide. The company offers also a professional white label trading technology for electronic trading services to a closed group of users on a proprietary branded platform.

360T has globally a strong market position with subsidiaries in New York, Singapore, Dubai and Mumbai and presences in 75 countries worldwide.

Junior Java Developer (m/f)

We need to fill positions in each of our three groups, Trading Components, Integration Components as well as Architecture and Framework so that he/she has the opportunity to participate and learn all aspects of the trading system.
