#TechMegatrend

Are you looking for an Internship? Do you have a passion for current technology trends, such as Artificial Intelligence, Blockchain, Internet of Things (IoT), Augmented Reality, Drones, Robotics or Virtual Reality? We are looking for creative minds that help our clients transform these technologies into actual solutions addressing their challenges. We are hiring for **part time/fulltime internship** position as **emerging technologies solution architect**.

As a solution architect you will have the chance to be involved in exciting, innovative projects such as our Artificial Intelligence project focusing on computer vision, object and text recognition and video tracking or our Blockchain projects focusing on design and implementation of permissioned and permissionless distributed ledger technology for various use-cases and applications.

**Location:** PwC Hamburg

**Duration:** Minimum 3 months

**Degree requirement:** Student in Computer science, electrical engineering or related fields.

**Knowledge requirement:** Advanced knowledge and/or a proven record of success in modern software engineering approaches, technologies, and tools, especially Object-oriented programming/scripting languages. Knowledge on one or more of the below mentioned is highly appreciated

- Python (the main required programming skill for people interested in AI and ML projects)
- Knowledge of C/C++ and Java Script is a plus
- Knowledge of one or more of the Hyperledger frameworks (Sawtooth, Indy, Fabric, Iroha) – For people interested in our Blockchain projects
- Knowledge of Solidity (Ethereum smart contracts) - For people interested in our Blockchain projects

**Contact:** Please send your CV to [alireza.ghods@pwc.com](mailto:alireza.ghods@pwc.com)
