

IT internship for nature

Naturefund is a non-profit conservation organization that purchases land worldwide to preserve habitats for the diversity of animals and plants. In just a few years, Naturefund has bought meadows, forests and wetlands. Communication and coordination of our protection projects is targeted via the Internet. We are looking for reinforcement for our IT department. In particular, knowledge of PHP and JavaScript is required.

Part of our team

During your internship in IT you are part of our team and support our conservation work in our headquarters in Wiesbaden. You help with the administration and further development of our IT systems. You will be directly involved in all processes, support the IT management and independently supervise initial projects.

You can do an internship with us during your studies for two, three or even six months.

Your responsibilities:

- Programming & further development of IT databases;
- Assistance / development of mobile applications;
- Assistance / development of the website based on Typo3;
- Willingness to save the world.

Your profile:

- Advanced programming skills in PHP and JavaScript;
- Advanced programming skills in MySQL databases;
- Knowledge of web applications;
- Knowledge in jQuery;
- Motivation and interest in nature conservation topics;
- Commitment, careful work, creativity and curiosity.

Please send your online application with your starting date to falk.berger@naturefund.de. If you have any questions or would like to know more about an internship at Naturefund, you are welcome to contact us directly.
