

Front-End Developer

Vitapio is the new solution for Recruiting, Sourcing & Staffing!
... we are looking for

interns

full-time

student employees

part-time

remote

Your tasks

-  Involvement in the entire development process of web-based projects in: Analysis, Implementation, Testing & Bugfixing
-  Coordination of a development team
-  Conception and implementation of new web frontends (based on screen designs)
-  Performance analyses, optimization and support of existing systems
-  Cooperation and coordination with the entire team
-  Connection of external APIs and implementation of interfaces to other systems
-  Analysis of customer requirements

Your profile

-  Very good knowledge of HTML, CSS, PHP, WordPress and modern JavaScript
-  Expertise in database design and with Git, GitHub, GitLab desirable
-  Experience with Responsive Web Design
-  Business Development
-  Interest in Performance, Usability & Security
-  Doer mentality and fun to implement innovative projects in a team
-  Reliability, motivation and loyalty in the daily working environment
-  No fear of the backend ;-)

Our Benefits

The opportunity to shape and design something completely new right from the start.

The chance to implement your own ideas instead of sticking to rigid processes.

Appreciation lived and, of course, a salary appropriate for the position.

Good traffic connections - also suitable for commuters from Hamburg, Oldenburg and the surroundings.

Monthly financial subsidy for fitness, yoga, club dancing and other sports activities that provide compensation.

Internships for students and other interested people possible at any time and of course remunerated.
