

Internship in Software Development (m/f/d)

You ...

- are constantly looking to learn new things, esp. regarding technical topics
- have a keen perception and analytical mindset
- are successfully studying a technical subject (computer science, physics, mathematics, etc.) with high standards of achievement
- are available for at least eight weeks
- possess some basic IT knowledge and coding experience

Your role:

- Support in the development and optimization of various software systems
- Implementation of internal tools, prototypes, or external customer projects
- Depending on the project specifics, integration into agile team structures
- Various options to get involved within TNG

Our offer:

- A demanding, academic environment
- An open-minded and team-oriented culture characterized by strong cohesion and flat hierarchies
- Continuous learning within our internal techdays (up to 10% of the working time) as well as external trainings
- Attractive work-life balance with 2.5 vacation days/month
- Supply with drinks, fruits, sweets, ice cream, and steaks
- Optionally, a working student activity following the internship

Entry dates are flexible and possible at any time. Apply **online** or via work@tngtech.com.

We are looking forward to getting to know you!

TNG Technology Consulting

As a partnership-based IT consultancy, we work in a customer-oriented manner on a variety of projects in the areas of Agile Software Development, Artificial Intelligence and DevOps & Cloud. In addition, we work on topics in Big Data and IoT. We mostly use Java and JavaScript, but also other programming languages, such as Python or C#.

Our customers include large corporations as well as medium-sized companies and start-ups from a wide variety of industries, including e.g. telecommunications, security technology, insurance, sporting goods, fintech, and automotive.
